

Weekly Disease Surveillance Report

2021 Reporting Week 47: November 21 — November 27

This weekly report is produced by the DOH-Okaloosa Epidemiology Section to provide situational awareness to community partners. Data is subject to change as additional information is gathered.

Influenza (Flu) and COVID-19 Updates

Influenza-like illness (ILI) activity in Okaloosa dropped this week to 2.79%, yet still slightly higher than our usual average at this time. Providers are encouraged to review CDC's [Seasonal Influenza Vaccination Resources for Health Professionals](#) for counseling on co-administration of COVID-19 and flu vaccines, patient education, and the 2021-22 flu vaccine composition.

Okaloosa COVID-19 positivity rate and number of COVID-19 cases decreased again during Week 47. The community risk level remains at MODERATE. COVID-19 vaccinations continue to show positive trends with fully-vaccinated Okaloosans currently at 64.4% (115,035 individuals). Providers are encouraged to continue to promote the COVID-19 vaccine as it is highly effective at preventing severe disease and death.

COVID-19 Booster Shots and Monoclonal Antibody Resources

On October 21, 2021, the [CDC Expanded Eligibility for COVID-19 Booster Shots](#). The CDC recommends that certain people are now eligible to receive a COVID-19 **booster** shot, including those who received Moderna and J&J/Janssen COVID-19 vaccines.

Additionally, CDC continues to recommend that [moderately and severely immunosuppressed people](#) who completed either the Moderna or Pfizer vaccine series get a **third dose** of the same mRNA vaccine at least 28 days after the second dose as they may not build the same level of immunity to 2-dose vaccine series compared to people who are not immunocompromised.

FREE [Monoclonal Antibody Treatments](#) are available in Okaloosa for use in adult and pediatric patients (12 and older) who have either been diagnosed or exposed to someone with COVID-19 and are at high risk for progression to severe illness, hospitalization, or death from COVID-19. Please follow the link for all locations.

The Florida Department of Health (FDOH) provides the Centers for Disease Control and Prevention (CDC) with county COVID-19 data, including deaths.

Please visit the [COVID-19 Community Profile Report](#) webpage to obtain death data by downloading the most recent excel file and locating Okaloosa on the 'Counties' tab.

For questions related to COVID-19 death data, please contact the FDOH Office of Communications at 850-245-4111 or NewsMedia@flhealth.gov.

Week 47 Community Risk Level		
COVID-19 Community Risk Level	New Cases per 100K Population per Week	% Positivity per Week
MODERATE	28.1	3.2%
PREVIOUS WEEK RISK LEVEL: MODERATE		
Low	<10	<5%
Moderate	10-49	5-7.9%
Substantial	50-99	8-9.9%
High	>100	>10%

Community risk level is the color of the higher risk level for the two indicators.

VACCINATION DATA RESOURCE

The CDC COVID Data Tracker presents county level vaccination data that includes vaccinations from:

- FL SHOTS, including FL Department of Health, retail pharmacies, and long-term care facilities,
- Dialysis centers participating in the Federal Dialysis Center Program,
- Health Resources and Services Administration partner sites, and
- Federal entities such as Department of Defense, Veterans Health Administration, Indian Health Service and Bureau of Prisons.

Influenza-Like Illness

Week 47: November 21- November 27

Influenza-like Illness (ILI) is defined as fever greater than or equal to 100°F AND cough and/or sore throat in the absence of another known cause.

Figure 5: Annual comparison of the percent of all hospital ED visits due to ILI for Okaloosa County for the 2017-18, 2018-19, 2019-20, and 2020-21 influenza seasons by week. Data source: ESSENCE

ANALYSIS: During Week 47, flu reporting partners and ESSENCE (a syndromic surveillance system) reported a decrease in ILI activity for Okaloosa County. The percentage of ILI ED visits in Okaloosa County decreased from 3.86% during Week 46 to 2.79% during Week 47. Flu partners reported no positive rapid influenza tests this week. Over the past three weeks, 14 out of 138 influenza specimens submitted to the state lab were positive (8 Influenza A unspecified, 6 Influenza B unspecified). There were no ILI admissions, outbreaks, or deaths reported this week. The percentage of total ILI ED visits for Week 47 is higher than that of Week 47 last year.

Note: Other respiratory syndromes can be represented by increased ILI case numbers. Data Source: ESSENCE

% ILI by Age Group Week 46, 2021

Age Range	ILI Visits	Total ED Visits	% Total ILI Visits
0-4	17	168	10.12%
5-19	14	263	5.32%
20-34	10	426	2.35%
35-54	9	457	1.97%
55-74	6	463	1.30%
75+	1	258	0.39%
